# Overview

## ClearSkies™ TDIR – Optimized for Faster Detection and Response

The latest release of ClearSkies™ Threat Detection, Investigation, and Response (TDIR) is designed to help organizations and MSSPs drastically **reduce Mean Time to Detect (MTTD) and Mean Time to Respond (MTTR)** — two critical factors in **minimizing the impact of modern cyber threats**. By automating detection and response workflows, enriching alerts with real-time intelligence, and **providing clear investigative guidance**, **ClearSkies™ TDIR** empowers your SecOps team to contain threats faster, limit damage, and maintain operational continuity.

## What's New in v.6.9

### **ClearSkies™ Lite: Small business security made simple**

ClearSkies™ Lite is an entry-level SIEM purpose-built for small and medium-sized businesses that start their cybersecurity journey and need essential detection and compliance capabilities — without the complexity. Delivered online and ready to deploy, it protects your data, ensures regulatory readiness and keeps threats in check. It offers basic log collection and essential correlation rules to detect common threats, along with predefined NIS2, ISO 27001 & NCA compliance-ready reports to be compliant with minimal setup.

### Important Notes

No special considerations applicable for this version.

## Enhancements

Category	Enhancement	Details
API	Bulk Keywords Creation Update	Updated the Create Bulk Keywords API to align with the latest REST API parameter structure for improved compatibility and consistency.
Backend	About Module Update	Updated the About and Contact Us information sections across all portals.
ClearSkies™ Online Purchase	Online Purchase Support	Updated licensing model and SKUs to enable seamless online purchase, activation, and provisioning of ClearSkies™ Lite.
ClearSkies™ Online Purchase	Orders Monitoring	Introduced the Orders Monitoring engine to track and manage online orders in real time, supporting end-to-end visibility and issue detection.
ClearSkies™ Online Purchase	Orders API	Implemented a new Orders API web service, enabling apps to programmatically create, retrieve, and monitor orders for full integration with your workflows.
ClearSkies™ Online Purchase	CSCRM Enhancements	Implemented backend changes and portal updates in CSCRM to manage online ClearSkies™ license sales via Customer Onboarding Automation.
ClearSkies™ Online Purchase	eShop Website	Developed the external eShop (frontend and backend) to enable self-registration for new ClearSkies™ customers.

## Bug fixes

This version resolves a number of stability and performance issues identified.

**Important Note:** This release brings substantial performance, usability and effectiveness capabilities with the introduction of new vendor/product integrations.

Thank you for your continued support, insights and valuable feedback.

## Appendix A: New Supported Vendor/Products

Vendor	Product	Product Category	Product Version	Log Collection Method
Cisco	Secure Endpoint	Log Integration	N/A	API
CommScope Ruckus	Smart Zone Essentials (WLAN Controller)	Network Management	6.1.0	Syslog
Google	Cloud Logging Service	Log Integration	N/A	API
